PATRONS:

Ministry of Environmental Protection, Physical Planning and Construction

Croatian Chamber of Economy - Affiliation of Packaging Industries

Croatian Chamber of Economy - Affiliation of Chemicals, Plastics and Rubber Processing

CO-AUTHOR OF THE PROGRAMME:

Marica Mlinac Mišak, PhD

The aim of the Conference is to present the development and applications of new polymeric materials and their modifications in the primary and secondary packaging industry, the current requests of Croatian and European packaging-related legislation for the application in food, pharmaceutical, cosmetic and other industries, with particular emphasis on the marking of packaging and management of packaging and packaging waste.

The Conference is intended for the users of plastic packaging, technologists engaged in industrial development of packaging, processors and producers of polymeric products and packaging and environmental protection experts.

During the Conference an exhibition of packaging entered into **CROPAK 2006** competition, as well as materials and equipment intended for processors, the labels and packaging materials intended for the food processing and beverage industries will be organized.

Lectures will be given by experts from the world-renowned institutes for development of plastic packaging, local experts engaged in development of packaging for food, as well as by experts from foreign companies which are leaders in development of specific polymeric materials in packaging and flexible plastic packaging materials.

The official languages of the Conference are Croatian and English.
